CHAPTER 3.2 - EXERCISES

EVANGELOS C. ZIOULAS (IT TEACHER)

EXERCISE 1

- Place the following software applications into the correct categories of the table below:
- Power Director, Photoshop, Audacity, Pinnacle Studio, Sound Studio, Corel Video Studio, Corel Draw, Sound Forge, Adobe Premiere Elements, FantaMorph, WavePad

Sound	Graphics	Video	Animation
.....

EXERCISE 2

- **Audacity** (which is a free application found at <http://www.audacity.sourceforge.net>) helps user to edit easily and effectively a sound file.
- With the help of Audacity create an **.wav file** which will include the basic part (chorus) of your favorite music song.
- Using possibly additional equipment (usb cable or accompanying software of your mobile phone), set the file you created before as your mobile **ringtone**.

You may need to covert your file into .mp3 before you assign it as a ringtone in your mobile phone.

EXERCISE 3

- Chapter 3 – Activity 7 (School book p.129)
- With the help of a microphone device, record your voice saying the next message:
“John loves playing soccer, but Maria likes playing volley”
- Using a sound editing software (like Audacity) try to change the previous recording creating a new sound file with the following content:
“Maria loves playing soccer, but John likes playing volley”
