COMPUTER HARDWARE

CHAPTER 2.1 - EXERCISES

EVANGELOS C. ZIOULAS (IT TEACHER)

EXERCISE 1

- **Chapter 2 – Activity 6 (p.31)**
  - Your school uses a computer to create your progress reports of each term.

  - Record the input devices that must be used for the input of computer data.

  - A report should have a photo of student. Which device would you propose to insert it?

  - Professor of Computer suggests to school to buy a memory device (such as a flash memory), for storing the data. Why do we need a second storage medium other than hard disk?

EXERCISE 2

- Explain which peripheral devices of computing system are associated with each one of the next terms:

flatbed	sampling	teleconference
LaserJet	transfer rate	refresh rate
CRT	QWERTY	trackball
dot-matrix	LCD	CMYK model
resolution	Inkjet	optical
pixel	Handheld	AC 220 to DC 5 Volt
blackouts	posters	modulation

EXERCISE 3

Classify the following devices into basic categories of hardware:

A) Input   B) Output   C) Central Unit   D) Storage

EXERCISE 4

Fill the next map with the necessary terms:
